EXPERIENCE

Backend Developer

Wipro

📅 March 2023 -Present 📍 Bengaluru, India

- I have 1+ years of experience in Web Application Development using Java, Python, Spring boot, SQL, Reactive Programming.
- Experience in Designing and Developing modules for key functionalities in optimal way to reduce Time Complexity.
- Involved in Process Migration of modules which resulted in faster and efficient Performance.
- Involved in testing Frameworks like Junit, Mockito.
- Knowledge on version control tools like Git for maintain the code.
- Involving with Superiors for requirement Analysis and Collaborating with team and producing better ideas.

Backend Development Intern

Wipro

📅 March 2022 – Aug 2022 📍 Remote

- Developed Full Stack Web application using Java, Spring boot, JavaScript, HTML, CSS, Angular, MySQL.
- Done Unit Testing for the Application using JUnit.
- Tested the API's with different possible scenarios using Postman.
- Collaborated with team and discussed the possible solutions.

ACHIEVEMENTS

- Obtained **5-Star** Batch in HackerRank Java Problem Solving.
- Successfully completed **Full Stack Java Certification** from NIIT StackRoute.
- Made **20+ Personal Projects** in Web Development (Frontend + Backend) using Different Web Technologies.
- Solved Over **300 Coding Questions** on Different Coding Websites.

CERTIFICATIONS

- Full Stack Developer -[Stackroute NIIT](#)
- AI For Everyone -[Deeplearning.ai](#)
- Associate Cloud Engineer -[GCP](#)
- SQL Database -[Infosys Springboard](#)
- OpenStack and NFV (Telco Cloud) -[Udemy](#)

EDUCATION

B.Tech. (Mech) - 9.58 CGPA

Walchand Institute of Technology, Solapur

📅 2019 – 2022 📍 Solapur, Maharashtra

Diploma (Mech) - 86.88%

Solapur Education Society polytechnic

📅 2016-2019 📍 Solapur, Maharashtra

PROJECTS

ResourceBlocker App

- Java | JSP | MySQL | SpringBoot and Spring | HTML, CSS
- This project provides a user-friendly application to effectively manage and reserve company resources, including conference rooms, cubicles, laptops, and projectors, streamlining the resource booking process. [Github](#)

Pollution CheckApp

- Angular | Java | HTML | CSS | SpringBoot | MySQL | MongoDB
- This application provides the Air Quality Index, pollution level, humidity, and main pollutant information for each city in different states and countries, allowing users to monitor environmental conditions. [Github](#)

MovieLibraryWebApp

- JSP | Java | SpringBoot | HTML | CSS
- Developed "MovFlix", an online Movie Library application allowing users to search and view movie details based on ID, name, or earnings range. Implemented admin functionalities for adding and modifying movies, with future plans for delete feature. Designed intuitive Home Screen for seamless user experience without login requirement.
